Reinforced Concrete Girder Bridges of Over 100 Ft. Span 193
By K. HAJNAL-KONYI

Job Problems and Practice 201
35–10 How high to back-form arch? 201
35–11 Redesign of large mixers? 202
35–7 Non-durable chert? 202
35–12 Notes from the testing laboratory 203
35–13 Placing concrete against insulation board? 203
35–14 How effective is hot mixing water? 203
35–15 What limits for sodium sulphate test? 204
35–16 Grand Coulee consistency meters 204
35–17 Quantities of solids in slurries? 207
35–18 How to finish silo interior? 208
35–19 Exterior painting of concrete 209
35–20 Building code requirements for analysis of fresh concrete? 210
35–21 How to design concrete mixtures? 211
35–22 Coloring concrete by absorption? 215
35–23 Curing test cylinders in the field? 216

Low Head Permeability Tests of Mortar Pots 285
By J. C. PEARSON and R. F. ADAMS

Job Problems and Practice 289
35–24 Roughing floor slab to bond finish? 289
35–15 What limits for sodium sulphate tests? 290
35–25 Field curing room 291
35–26 Should reinforcement be free from rust? 291
35–27 Concrete tanks for wine and grapejuice? 291
35–28 What heat will concrete withstand without deterioration? 292
35–29 Metallization of concrete tanks? 293
35–30 Stone sand as concrete aggregate? 293
35–31 Concrete tanks for oil and gasoline? 298
